

Flow rate indicator cum totalizer

BROILTECH produced flow rate totalizer for liquid flow sensor, its very simple and low cost product for flow measurement with pulse output flow sensor

Features & technical data

Password protection

Dimension : 96*96, 96*48

Input : flow : pulse input

Output: Analogue output : 4 to 20mA(optional)
: Communication: RS 232/RS485 (optional)
: Relay : 1 or 2 relay (batching relay with flow rate and total)
: Pulse output
: Free output: 24v dc or 12v dc

Display : backlit LCD,
: Display flow rate, flow total, alarm status

Measuring range: -9999 to 9999 flow rate
: 0 to 999999.99 flow total

Accuracy : 0.2% FS +/- 1 D

Power supply: AC 220V /24V DC
Operating temp : -20 to 60 deg c
Power consumption: less than 10 W

Over all above flow rate totalizer is simple and easy to use for single application

Application

- Highly reliable and accurate measurement of flow rate and total
